Opis produktu

Jasmin Day Cream 50ml - Smoothing and Regeneration Jasmin Day Cream is a modern skincare product designed specifically for the daily care of mature women's skin aged 50+. Its advanced formula, enriched with physiolipids and hyaluronic acid, effectively compensates for and maintains lost collagen, resulting in improved skin texture and reduced signs of aging. This cream offers multiple benefits for mature skin: - Effectively enhances the resilience of collagen and elastin fibers - Promotes proper cross-linking of protein fibers - Increases density and firmness of connective tissue - Provides elasticity and prevents loss of skin's natural elasticity - Improves skin tension and reduces roughness - Helps regenerate skin's supporting function, preventing sagging - Effectively reduces the depth of both deep and superficial wrinkles - Provides excellent hydration for the epidermis and deeper layers of the skin - Enhances skin tone - Regulates the protective barrier functions of the skin - Replenishes physiological lipid deficiencies - Nourishes and softens the skin, restoring its healthy and natural appearance
Usage: Apply the cream 2-3 times a week, in the morning and/or evening, to the face and neck. Gently pat it into the skin. For best results, we recommend using Jasmin Essence immediately after absorption and pairing it with our anti-wrinkle cream as an effective treatment. Product Code: ZZ412 Please note that this product is offered at a discounted price due to minor flaws such as outdated packaging, stains, or partial label missing.
